LAFORTE®

SGIA
EXPO
2017 • Exhibitor

Aleph is showcasing its LaForte®Paper at SGIA Expo (Booth # 2577)

10 October 2017, Lurate Caccivio, Italy : As a leader in the international digital printing industry, Aleph, an Italy-based fast growing company, will take part at upcoming exhibition SGIA Expo 2017 in New Orleans, showcasing the successful LaForte®Paper Industrial printer for textile and sign graphic market.

Since its first reveal at ITMA 2015 in Milano, the LaForte®Paper has achieved its recognition from not only in Italian market but also in international market for its high standard performance, high quality printing results and its high technology and high speed which allows to enhance the whole production.

Meanwhile, the distinctive elements of this iconic printer are the design of LaForte®Paper which reflects its strength and stability of performance, and the easy-to-use interface provides great convenience to users.

The Aleph LaForte®Paper responds to the need of digitalization by Aleph customers, from medium to large companies.

Production capacity

LaForte Paper has a high production capacity, reaching a maximum speed of 920 sqm/h

Patented System

Innovative rotary belt with air vacuum system that eliminates the need of glue.

Magnetic linear motion

Precise head movement guaranteed by magnetic force.

Resolution

1200 dpi with piezoelectric variable drop technology.

Easy alignment

The easy alignment of the print heads guarantees perfect printing.

Innovative control software

The new software for dot matrix layout guarantees exceptional performance.

While the number of LaForte® installed in Italy and abroad continues to increase and customer feedbacks are very positive, Aleph R&D department is currently working on new technology and solution developments to spread its business in other international markets as well.
